REDYREF KIOSKS

MATRIX SURFACE & RECESSED

The REDYREF Matrix wall-mounted kiosk is one of our most in-demand designs, suitable for digital signage, electronic directory and interactive wayfinding applications. Its clean, elegant design was engineered to enclose displays in landscape or portrait orientations in a modern stainless steel finish (custom powder coat finishes are also available).

The Matrix is available in Surface or Recessed models with both touch- and non-touch displays from which to choose, while the generous standard display size lends itself to easy end-user interaction, including the use of typeable, on-screen keyboards.

Although it is a popular choice for commercial office spaces, it is at home in many other indoor environments, from hospital and college campuses to convention centers and hotel lobbies. Durable, flexible and customizable with a wide-variety of available integrations, the Matrix is an ideal digital kiosk solution for a wide variety of deployments.

Standard size: 22", 32", 42", 55"

ENGAGE T-SERIES

When space is at a premium but can't come at the cost of functionality, the enGAGE T-series freestanding digital kiosk is an ideal choice. With its minimal footprint, the T was designed to offer the power and performance of a standard-sized kiosk but in a compact form factor by utilizing a touchscreen tablet computer, rather than a typical display.

Whether used for visitor self-check-in or integrated with EMV or NFC systems for self-pay applications such as commissary, QSR self-check out and even retail sales floors, the T lends itself to easy and intuitive end-user interaction. It's superior external brandability is also a key feature, allowing companies to make a bold visual statement even in small spaces.

Durable and exceptionally customizable with a wide-variety of available integrations, the enGAGE T is an ideal digital kiosk solution across a wide variety of deployments.

Standard size: Standard tablets - iPad, Samsung Galaxy, Microsoft Surface, ELO iSeries; Standard Display Sizes - 9", 10", 12", 15", 19", 22"

REDYREF KIOSKS

ENGAGE L-SERIES

The enGAGE L-Series is a low, freestanding kiosk enclosure combining sleek, powder-coated steel construction with modular design and an extensive range of available components that make it one of our most flexible kiosks across deployments. The angled lower monitor makes it an excellent choice for directory and wayfinding purposes.

The L is also popular for its optional twin screen configuration, which maximizes opportunities to utilize the kiosk for both interactive and static purposes. Help visitors find their way on the lower touchscreen with interactive building and campus maps, while advertising local businesses or facility features on the eye-catching upper screen. Or, integrate bill, coin or even gift card dispensers along with a receipt printer for an attractive, user-friendly self-pay solution.

A wide range of powder coat finishes, an incredible selection of customizable components and superior brandability make the L an ideal choice for a variety of indoor environments, from commercial office lobbies and multi-building healthcare campuses to food-service payment needs.

Standard size: 22", 24"

ENGAGE H-SERIES

With its clean lines and generously-sized portrait-style display, the enGAGE H freestanding kiosk is one of our most popular designs for indoor digital signage. It is also an ideal choice for indoor wayfinding and directory use, especially when integrated with software that includes a touchscreen keyboard.

The H is an excellent choice for a variety of other applications as well, whether used to display local area information in transportation hubs such as train stations and airports, or in commercial office lobbies to assist guests in finding their way within or around single buildings or multi-facility campuses. It can also be used in a variety of transactional settings when integrated with available components for retail and financial deployments.

While the H lends itself to easy, empowered end-user interaction, its superior brandability is also a key feature, due to its ample exterior surface area which can be customized in a variety of powder coat colors.

Whether configured with a touch or non-touchscreen display, the enGAGE H makes a bold statement across deployment environments.

REDYREF KIOSKS

ENGAGE C-SERIES

The enGAGE C-Series is a countertop-mount digital kiosk enclosure that is ideal for a range of applications, from visitor management and digital receptionist use, to commissary and food-service self-pay needs.

The enGAGE C combines sleek, powder-coated steel construction with modular design and an extensive range of available options. Whether as a non-touch kiosk showcasing local information or a static directory assisting visitors at a reception desk, or integrated with EMV or NFC systems for interactive self-pay applications such as QSR self-check out and even retail cash wraps, the C streamlines visitor interactions in a brandable, compact form factor.

Standard size: 19", 22"

RAZOR 2.0

The REDYREF Razor 2.0 freestanding kiosk features a sleek, flexible design that makes it a true "kiosk chameleon," ready and able to take on whatever duties required. Although the Razor is perfect for digital signage, electronic directory and interactive wayfinding applications, a wide-range of optional components also makes it an ideal choice for retail, hospitality, self-ticketing and self-pay needs.

The Razor 2.0 features a metallic powder coat finish and radiused corners for a contemporary but inviting look. Generous space on the enclosure's surface allows for extensive branding opportunities to engage potential customers while allowing them to take control of their user experience via self-service technology.

Durable and exceptionally customizable with a wide-variety of available integrations, the Razor is an ideal digital kiosk solution for a range of deployments.

Standard size: 19"

REDYREF KIOSKS

EMPIRE 2.0

The Empire 2.0 freestanding kiosk is one of our most striking designs for digital signage, directory and interactive wayfinding applications. It's sleek lines were engineered to enclose larger monitor sizes on an elegant pedestal in a landscape orientation with a white powder coat finish. The generous display size lends itself to easy end-user interaction, including the use of typeable, on-screen keyboards.

With its superior brandability, Empire is also suitable as an information kiosk, and makes a bold statement in any environment, from office lobbies to convention centers. It can even be configured in multiple different ways -- flat display (tabletop) or angled display, with both touch and non-touch options from which to choose. Durable, flexible and customizable with a wide-variety of available integrations, the Empire is an ideal digital kiosk solution for multiple deployments.

Standard size: 32", 42", 55"

REDYTOUCH

Sleek and elegant with a minimal footprint that adapts easily to any indoor environment, the RedyTouch digital kiosk provides a highly-brandable platform that simplifies end user interactions. The attractive design provides generous exterior surface space for customization, allowing companies to easily visually engage with potential customers.

The RedyTouch can be configured to perform tasks including electronic bill payment processing, visitor check-in and even retail barcode scanning. With additional optional integrations such as a bill collector, external keyboard and internal receipt or ticket printer, it is a versatile kiosk choice that empowers users across multiple applications, including retail, commercial office and hospitality-centered spaces.

Standard size: 17"

REDYREF KIOSKS

PRODIGY/PRODIGY-C

When space is at a premium but can't come at the cost of functionality, the Prodigy digital kiosk is an ideal choice for even the smallest areas, from hotel beverage and snack centers, to corporate commissaries.

With its minimal footprint, the Prodigy was designed to offer the power and performance of a much larger kiosk but in a compact form factor by utilizing either a touchscreen tablet computer, or a typical touchscreen display. Either option pivots, allowing for manual adjustment of the viewing height for exceptional ADA compliance. The Prodigy is also available in both freestanding (Prodigy) or countertop models (Prodigy-C) making it adaptable across environments.

Excellent external brandability is one hallmark of the Prodigy, allowing companies to make a bold visual statement even in compact spaces. But where the Prodigy really shines is its flexibility, the result of a wide range of available component integrations.

Whether used for visitor management as a virtual receptionist, or integrated with EMV or NFC systems for self-pay applications like QSR self-ordering, the Prodigy's human-scale design lends itself to easy and intuitive end-user interaction.

Standard size: 15", 22"

T-FLEX/T-FLEX-C

The REDYREF T-Flex Kiosk is one of our most customizable solutions for order-entry needs; it can be built as a counter-mounted kiosk, or as a slim, freestanding kiosk.

The T-Flex can be built with optional integrations including secure payment systems such as EMV ("chip and pin") and NFC (near-field communication). This makes it an excellent choice for use in quick service restaurants (QSRs) and any other application where secure self-checkout/self-pay applications are required.

Both available form factors feature a compact footprint that is ideal for environments where space is at a premium. While the desk-mounted option offers an opportunity to move the kiosk out of the line of foot traffic to a pre-installed counter, shelf or cashwrap area, both designs are appropriate for even the smallest spaces, including hotel beverage and snack centers, unattended micro markets, and corporate commissaries.

Sleek steel construction, a wide range of available integrations such as receipt printers and signature pads, plus a selection of powder coat finishes from which to choose make the T-Flex an ideal kiosk for multiple self-pay deployment opportunities.

Standard size: Standard tablets - iPad, Samsung Galaxy, Microsoft Surface, ELO iSeries; Standard Display Sizes - 9", 10", 12", 15", 19", 22"

REDYREF KIOSKS

PRESTO

The REDYREF Presto order-entry kiosk is a floor or wall-mounted interactive solution featuring powder-coated steel construction and generous exterior surface area that provides superior branding opportunities. It offers a sleek profile and superior security for high-traffic environments such as those found in quick-service restaurants (QSRs).

The Presto can be built with optional integrations including secure payment systems such as EMV (“chip and pin”) and NFC (near-field communication). This makes it an excellent choice for use in any application where secure self-checkout/self-pay applications are required. The Presto’s design also allows for easy access to equipment for maintenance, as well as a location for a compact computer or media player, and ventilation for consistent air flow.

A wide-range of available integrations including physical keyboards and signature pads, combined with numerous opportunities for branding customization make the Presto an ideal kiosk across multiple self-pay deployments.

Standard size: 22”

SKYLINE

With its crisp, clean lines and portrait-style orientation, the Skyline freestanding kiosk was designed with proportions reminiscent of a sleek high-rise skyscraper. Although it is one of our most popular designs for outdoor digital signage, it is an excellent choice for a variety of other applications both indoor and out. This includes interactive wayfinding across large office and hospital campuses, “smart city” placement in bustling metropolitan areas, and in transportation hubs, such as train stations and airports.

The Skyline’s generous display size lends itself to easy end-user interaction, including the use of typeable, on-screen keyboards. Superior brandability is also a key feature of the Skyline, due to its ample exterior stainless steel surface area which can be customized in a variety of powder coat colors.

Whether configured with a touch or non-touchscreen display, the Skyline makes a bold statement across environments, from outdoor advertising displays in busy cities, to directories in indoor multi-building campuses.

Standard size: 42”

REDYREF KIOSKS

BAZOOKA 2.0

With its IP design, the Bazooka was designed to withstand just about anything the environment -- both indoors and out -- can throw at it. From self-pay amusement park concessions in the high-heat and humidity of a Florida summer, to winter ski-lift ticketing in the cold, snowy Rockies, the Bazooka stands ready to perform.

The Bazooka is an excellent choice for indoor applications, too. It can be configured to perform tasks including bill payment processing, customer check-in and even retail barcode scanning. With additional optional integrations such as bill/coin collection and receipt printing available, it is a modular and incredibly flexible interactive kiosk choice.

Bazooka's exterior offers ample space for branding and its coloration may be selected from a wide-variety of different powder coat finishes. Its modular door panel design allows for even greater customization when required, making the Bazooka digital kiosk a favorite for multiple applications, including retail, financial and self-service ticketing needs.

Standard size: 22"

MEDIA TOWER

With its IP design, the Media tower was designed to withstand even the most rugged and extreme environments, both indoor and out. Whether deployed as a "smart city" information hub in a major Southern metropolis or as the primary directional and wayfinding system for a modern lifestyle center in a snowy Northern suburb, the Media Tower can handle it all.

Ample exterior surface area and optional illuminated signage allows the Media Tower to serve as a "brand beacon," a powerful and engaging platform for solidifying messaging while making a bold statement across environments. Use it to create a flawless wayfinding experience for users or make them social media stars by integrating the optional HD camera (smart city selfie, anyone?).

Durable, flexible and customizable with a wide-variety of available components, the Media Tower is an ideal digital kiosk choice across environments.

Standard size: 55"
