EMPIRE 2.0

HARDWARE

Standard sizes:
32", 42", 46" & 55"
and custom sizes available

A stunning digital kiosk for digital signage, directory and interactive wayfinding applications in any indoor environment.

The Empire 2.0 freestanding kiosk is one of our most striking designs for digital signage, directory and interactive wayfinding applications. Its sleek lines were engineered to enclose larger monitor sizes on an elegant pedestal in a landscape orientation with a white powder coat finish. The generous display size lends itself to easy end-user interaction, including the use of typeable, on-screen keyboards.

With its superior brandability, Empire is also suitable as an information kiosk, and makes a bold statement in any environment, from office lobbies to convention centers. It can even be configured in multiple different ways -- flat display (tabletop) or angled display, with both touch and non-touch options from which to choose. Durable, flexible and customizable with a wide-variety of available integrations, the Empire is an ideal digital kiosk solution for multiple deployments.

Also available:

- Custom branding including silkscreen, decal and vinyl wraps
- Optional component integrations (see p. 2 tech specs)
- Touch (interactive) or non-touch (static) displays

ADA COMPLIANT
ISO 9001:2015 CERTIFIED
