SKYLINE HARDWARE

Standard sizes:
42.5" and custom sizes available

Ideal for outdoor digital signage, but makes a bold statement across applications, whether as a smart city kiosk or an indoor, multi-building commercial office directory.

With its crisp, clean lines and portrait-style orientation, the Skyline freestanding kiosk was designed with proportions reminiscent of a sleek high-rise skyscraper. Although it is one of our most popular designs for outdoor digital signage, it is an excellent choice for a variety of other applications both indoor and out. This includes interactive wayfinding across large office and hospital campuses, "smart city" placement in bustling metropolitan areas, and in transportation hubs, such as train stations and airports.

The Skyline's generous display size lends itself to easy end-user interaction, including the use of typeable, on-screen keyboards. Superior brandability is also a key feature of the Skyline, due to its ample exterior stainless steel surface area which can be customized in a variety of powder coat colors.

Whether configured with a touch or non-touchscreen display, the Skyline makes a bold statement across environments, from outdoor advertising displays in busy cities, to directories in indoor multi-building campuses.

Also available:

- Custom branding including silkscreen, decal and vinyl wraps
- Optional component integrations (see p. 2 tech specs)
- Touch (interactive) or non-touch (static) displays

ADA COMPLIANT
ISO 9001:2015 CERTIFIED
