# ENGAGE T-SERIES HARDWARE

**STARTING AT \$2,250**

Standard sizes:  
Tablet; 15", 19" & 22" Touchscreen Displays  
and custom sizes available

*Offers the performance of a much larger kiosk in a compact form factor; ideal for applications such as hotel self-check-in and QSR self-service ordering.*

When space is at a premium but can't come at the cost of functionality, the enGAGE T-series freestanding digital kiosk is an ideal choice. With its minimal footprint, the T was designed to offer the power and performance of a standard-sized kiosk but in a compact form factor by utilizing a touchscreen tablet computer, rather than a typical display.

Whether used for visitor self-check-in or integrated with EMV ("chip-and-pin") or NFC (Near-Field Communication) payment systems for self-pay applications such as commissary, QSR self-check-out and even retail sales floors, the T lends itself to easy and intuitive end-user interaction. Its superior external brandability is also a key feature, allowing companies to make a bold visual statement even in small spaces.

Durable and exceptionally customizable with a wide variety of available integrations, the enGAGE T is an ideal digital kiosk solution across a wide variety of deployments.

Also available:

- Custom branding including silkscreen, decal and vinyl wraps
- Optional component integrations (see p. 2 tech specs)
- Touch (interactive) or non-touch (static) displays

ADA COMPLIANT  
ISO 9001:2015 CERTIFIED

THE REDYREF CLIENT PORTFOLIO PROUDLY INCLUDES:
