BAZOOKA 2.0 HARDWARE

Standard sizes:
19", 22" and custom sizes available

A favorite for both indoor and outdoor applications, including retail, self-pay, financial and self-service ticketing needs.

Bazooka was designed to withstand just about anything the environment -- both indoors and out -- can throw at it. From self-pay amusement park concessions in the high heat and humidity of a Florida summer, to winter ski-lift ticketing in the cold, snowy Rockies, the Bazooka stands ready to perform.

The Bazooka is an excellent choice for indoor applications, too. It can be configured to perform tasks including bill payment processing, customer check-in and even retail barcode scanning. With additional optional integrations such as bill/coin collection and receipt printing available, it is a modular and incredibly flexible interactive kiosk choice.

Bazooka's exterior offers ample space for branding and its coloration may be selected from a wide variety of different powder coat finishes. Its modular door panel design allows for even greater customization when required, making the Bazooka digital kiosk a favorite for multiple applications, including retail, financial and self-service ticketing needs.

Also available:

- Custom branding including silkscreen, decal and vinyl wraps
- Optional component integrations (see p. 2 tech specs)
- Touch (interactive) or non-touch (static) displays

ADA COMPLIANT
ISO 9001:2015 CERTIFIED
