# T-FLEX HARDWARE

**Standard sizes:**  
10", 15", 20", 22"  
and custom sizes available

*A highly-customizable, compact self-pay solution available in freestanding or counter-mount form factors; ideal when space is at a premium.*

The REDYREF T-Flex Kiosk is one of our most customizable solutions for order-entry needs; it can be built as a counter-mounted kiosk, or as a slim, freestanding kiosk.

The T-Flex can be built with optional integrations including secure payment systems such as EMV ("chip and pin") and NFC (near-field communication). This makes it an excellent choice for use in quick service restaurants (QSRs) and any other application where secure self-checkout/self-pay applications are required.

Both available form factors feature a compact footprint that is ideal for environments where space is at a premium. While the desk-mounted option offers an opportunity to move the kiosk out of the line of foot traffic to a pre-installed counter, shelf or cashwrap area, both designs are appropriate for even the smallest spaces, including hotel beverage and snack centers, unattended micro markets, and corporate commissaries.

Sleek steel construction, a wide range of available integrations such as receipt printers and signature pads, plus a selection of powder coat finishes from which to choose make the T-Flex an ideal kiosk for multiple self-pay deployment opportunities.

Also available:

- Custom branding including silkscreen, decal and vinyl wraps
- Optional component integrations (see p. 2 tech specs)
- Touch (interactive) or non-touch (static) displays

ADA COMPLIANT  
ISO 9001:2015 CERTIFIED
