PRESTO HARDWARE

Standard sizes:
22" and custom sizes available

Purpose built to handle heavy use as an order-entry solution in QSR environments; able to be floor or wall-mounted.

The REDYREF Presto order-entry kiosk is a floor or wall-mounted interactive solution featuring powder-coated steel construction and generous exterior surface area that provides superior branding opportunities. It offers a sleek profile and superior security for high-traffic environments such as those found in quick-service restaurants (QSRs).

The Presto can be built with optional integrations including secure payment systems such as EMV ("chip and pin") and NFC (near-field communication). This makes it an excellent choice for use in any application where secure self-checkout/self-pay applications are required. The Presto's design also allows for easy access to equipment for maintenance, as well as a location for a compact computer or media player, and ventilation for consistent air flow.

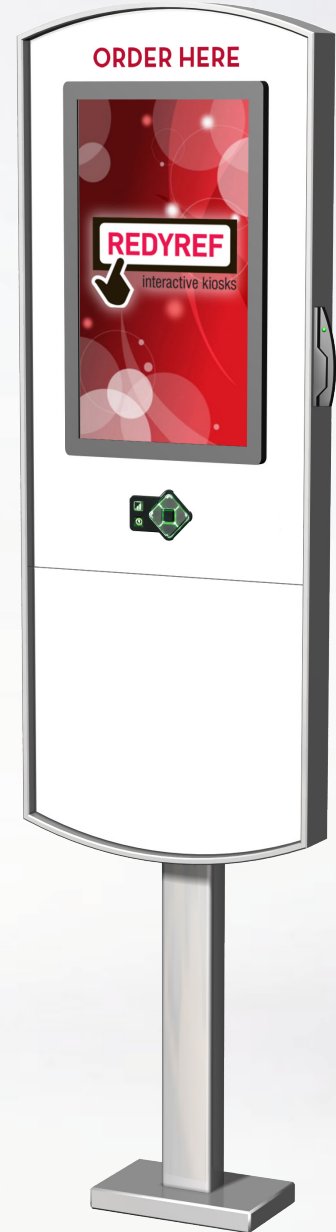

A wide-range of available integrations including physical keyboards and signature pads, combined with numerous opportunities for branding customization make the Presto an ideal kiosk across multiple self-pay deployments.

Also available:

- Custom branding including silkscreen, decal and vinyl wraps
- Optional component integrations (see p. 2 tech specs)
- Touch (interactive) or non-touch (static) displays

ADA COMPLIANT
ISO 9001:2015 CERTIFIED
