

# ENGAGE.TOUCH SOFTWARE MODULES

The enGAGE.Touch software platform offers a wide range of visitor management capabilities, including interactive directory, wayfinding, mobile handover, event management and e-Concierge functionality.

The enGAGE.Touch software suite features:

- A cloud-based content management system that allows users to easily manage all content and branding
- Cloud-based data storage with back-ups of past content
- Optional widgets including weather, an announcement ticker, news feeds, and the company Twitter feed
- Mobile Handover capabilities that allow guests to access or share directory and wayfinding content on their mobile phones
- Optional visitor management integration that adds a layer of security to visitor/employee interactions via SMS/email photo identification
- A single, easy-to-use dashboard for the entire software platform

# enGAGE.Touch Software Modules

 Directory	Each digital building directory is customizable to meet unique business needs, including support for detailed floor and campus maps. Editing permissions may be granted to multiple users, including office tenants. Facility services, amenities and announcements may be displayed alongside directory information. Can be displayed in lobby floor, desktop or wall configurations.
 Wayfinding	Designed to give visitors navigational support to and from any location, whether interior or exterior. Optional blinking paths and interactive 3D maps are also available, and SMS integration offers additional assistance for those who prefer written assistance.
 Mobile Handover	Allows users to transfer wayfinding maps to their smartphones as they navigate buildings or campuses.
 Visitor Management	Enables notifications to be sent directly from the visitor to the employee's mobile phone via SMS or email, simplifying communication for both parties while keeping contact information private. Can be used with an optional integrated camera featuring advanced photo-capture software for increased security.
 Event Management	Allows kiosks to dynamically display events at monitors or digital signage locations throughout buildings, facilities or campuses.
 Advertising Channel	Static or touchscreen options allow images and text to be uploaded to display advertising for businesses, products or services.

REDYREF provides support and services for software with an annual or monthly managed service rate.
