

CASH-TO-CARD KIOSK REVERSE ATM SOLUTION

From Manufacturing To Software Development, We Do It All In-House

CHOSEN BY TOP VENUES NATIONWIDE

SEE IT IN THE FIELD

WHY CUSTOMERS CHOOSE CASH-TO-CARD

Going cashless solves real operational problems. Here's what disappears the day the kiosks arrive:

Cash theft & robbery risk

No on-site cash drawers means no internal theft opportunity and no target for robbery — cash goes straight into a secured kiosk.

Counterfeit losses

High-security bill acceptors with built-in counterfeit detection screen every bill — no more manual checking, no more bad bills.

Cash-handling labor costs

Eliminate manual counting, till balancing, and reconciliation. Staff time goes back to serving guests, not counting drawers.

Accounting complexity

Every dollar becomes a digital transaction with real-time reporting — clean books, instant reconciliation, full audit trail.

Turned-away cash customers

Going cashless no longer means refusing cash. Guests convert bills to prepaid cards that work on-site and anywhere major cards are accepted.

Armored car pickup costs

Cash consolidates from every register into the kiosks — fewer pickups, fewer stops, lower fees, with pickup services coordinated by REDYREF.

Instead of managing cash everywhere, you manage it once — then operate as if your venue is fully cashless.

THE COMPLETE CASHLESS SOLUTION

REDYREF delivers a comprehensive cash-to-card ecosystem that goes beyond hardware.

WHAT SETS US APART

60-second-or-less transactions

get customers on their way, fast

TECHNICAL SPECIFICATIONS

HARDWARE PLATFORM

Component	Specification
Display	22" commercial-grade touchscreen with LED accent lighting
Connectivity	Ethernet standard, cellular optional
Cash Handling	High-security bill acceptor with counterfeit detection
Card Dispensing	Mag-stripe dispenser with large capacity hopper
Receipt Printer	Custom text receipt capabilities, optional thermal printing
Security	Bank-level encryption, PCI DSS compliant
Compliance	ADA capable, UL listed components

SOFTWARE FEATURES

- **Transaction Speed:** 60-seconds or less
- **Transaction Limits:** Up to \$1,000 per transaction
- **Multi-language Support:** Configurable language options
- **Custom Branding:** Interface and card customization available
- **Real-time Reporting:** Comprehensive transaction analytics

ADA ACCESSIBILITY

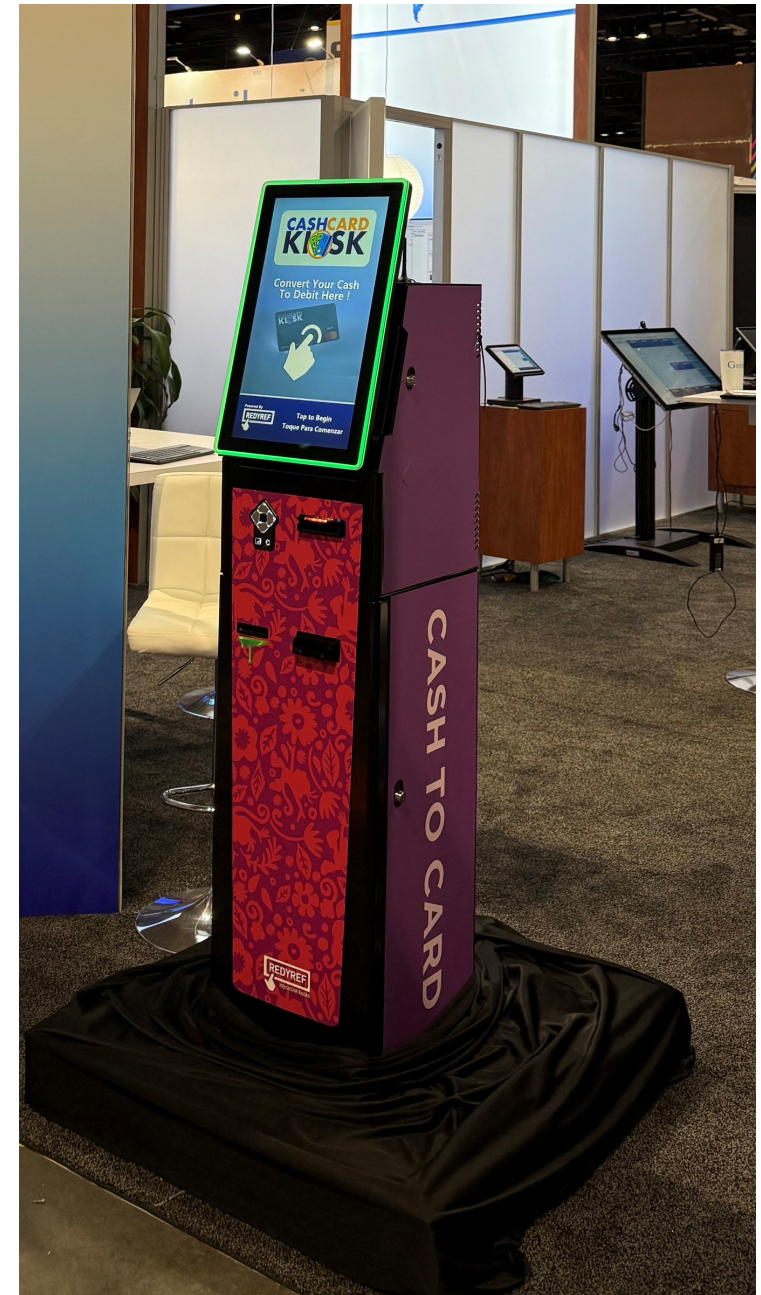

Every REDYREF Reverse ATM is built for full ADA accessibility, so guests using wheelchairs and guests who are blind or have low vision can complete transactions independently — no staff assistance required.

AUDIO + NAVIGATION

- Integrated Audio + Navigation Device: on-board module delivers step-by-step voice guidance through the entire transaction
- Private Headphone Navigation: guests with visual impairments simply plug in headphones and our software walks them through every screen with clear audio prompts
- Developed In-House: audio guidance is built into our own software, staying in sync with every interface update

PHYSICAL ACCESSIBILITY

- Braille Labeling: every user-facing component — bill acceptor, card dispenser, receipt printer, and headphone jack — is labeled in braille
- Wheelchair-Accessible Design: touchscreen and all interaction points positioned within ADA height and reach requirements
- Seamless Experience: accessibility is engineered into the kiosk from the start, not bolted on

CUSTOMIZATION CAPABILITIES

VISUAL BRANDING

- **Custom Vinyl Wraps:** Full kiosk branding with your logos, colors, and messaging
- **Branded Cards:** Custom Mastercard design featuring your venue branding
- **Interface Customization:** Tailored user interface reflecting your brand identity
- **Marketing Opportunities:** Promotional messaging on screens and discount coupons

OPERATIONAL FLEXIBILITY

- **Configurable Transaction Limits:** Set limits appropriate for your venue
- **Seasonal Promotions:** Update marketing messages and special offers
- **Multi-location Management:** Centralized control for venue chains

SERVICE & SUPPORT PACKAGE

✓ INCLUDED WITH EVERY DEPLOYMENT

- **Professional installation** and staff training
- **24/7 technical support** with live US-based agents
- **Cash pickup services** coordinated and managed
- **Ongoing maintenance** and remote monitoring
- **Card inventory management** with automatic restocking alerts; we supply cards at no cost
- **Performance analytics** and operational reporting

✓ COST ADVANTAGES

- **Discounted shipping and install** with 2-year agreement
- **Direct manufacturer pricing:** no service company markup
- **Competitive market pricing** vs. major competitors
- **Transparent pricing** with no hidden fees or surprises
- **Flexible payment options:** location pays, consumer pays or costs split
- **Revenue sharing available**

WHY VENUES CHOOSE OUR SOLUTION

SPEED & CAPACITY LEADERS

30-second transactions keep lines moving during peak times. Combined with **\$1,000 transaction limits**, customers spend less time at kiosks and more time enjoying your venue.

DIRECT MANUFACTURER ADVANTAGE

While most competitors are service companies using third-party hardware, REDYREF manufactures our kiosks in our own ISO 9001:2015 certified facilities. This gives us direct control over quality, performance optimization, and cost—advantages we pass on to our clients.

PROVEN ACROSS INDUSTRIES

From major sports stadiums to boutique hotels, our solution adapts to any venue size or type while maintaining the same high standards of performance and reliability.

COMPREHENSIVE CUSTOMIZATION

Full branding customization including cards, wraps, and user interface elements available to match your venue's identity and create a cohesive brand experience.

COMPETITIVE VALUE

Professional-grade solution with enterprise features designed to provide strong ROI through operational efficiencies and reduced cash handling costs. With 30-second transactions and \$1,000 limits, customers spend minimal time at kiosks during peak periods.

DEPLOYMENT PROCESS

PHASE 1: CONSULTATION & DESIGN

- Site assessment and optimal placement planning
- Operations assessment

PHASE 2: MANUFACTURING & PREPARATION

- Kiosk configuration with your branding
- Custom branding design and approval process
- Branded card production and inventory setup
- Pre-deployment testing and quality assurance

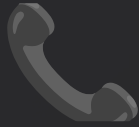

PHASE 3: INSTALLATION & LAUNCH

- Professional installation by certified technicians
- Staff training and operational procedures
- Go-live support and performance monitoring
